

## SIDE 2

Instructors can improve their classes through thoughtful student reactions. Please comment on any of the following about which you have an opinion—and be frank. Instructors do not have access to course evaluations until after final grades have been submitted.

1. What personal qualities or teaching skills of the instructor contributed to the success of the course?

Patience + willing to explain + (reexplain.)  
Enthusiasm for the subject makes all the difference.

2. What could be done to improve the quality of this course?

3. Do you believe this course should be offered? Explain.

Yes - Very relevant material and beneficial to my  
personal projects

4. Add any other comments.

**SIDE 2**

## SIDE 2

Instructors can improve their classes through thoughtful student reactions. Please comment on any of the following about which you have an opinion—and be frank. Instructors do not have access to course evaluations until after final grades have been submitted.

1. What personal qualities or teaching skills of the instructor contributed to the success of the course?

ENERGETIC, ENTHUSIASTIC, FUNNY

2. What could be done to improve the quality of this course?

MORE PRACTICAL PROBLEMS, MORE NUMERICAL PROBLEMS.

3. Do you believe this course should be offered? Explain.

YES, ESTIMATION IS WIDELY USED IN CONTROLS.

4. Add any other comments.

## SIDE 2

Instructors can improve their classes through thoughtful student reactions. Please comment on any of the following about which you have an opinion—and be frank. Instructors do not have access to course evaluations until after final grades have been submitted.

1. What personal qualities or teaching skills of the instructor contributed to the success of the course?

Helpful in and out of class.

It may not be double in a bigger class, but the detailed homework grading helped me learn a lot from my mistakes vs just seeing that I got something wrong.

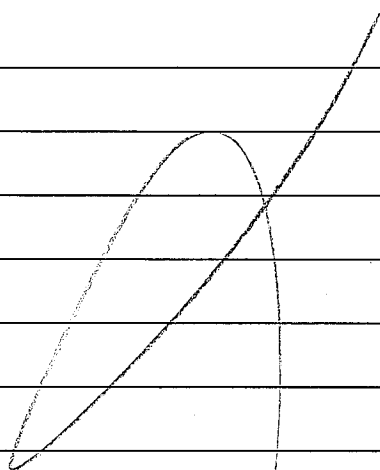

2. What could be done to improve the quality of this course?

Some lectures were confusing, but overall good.

3. Do you believe this course should be offered? Explain.

Yes, its the only course in practical applications involving noise and other probabilistic quantities I have taken.

4. Add any other comments.

## SIDE 2

Instructors can improve their classes through thoughtful student reactions. Please comment on any of the following about which you have an opinion—and be frank. Instructors do not have access to course evaluations until after final grades have been submitted.

1. What personal qualities or teaching skills of the instructor contributed to the success of the course?

Very emphatic and rigorous style of teaching is always conducive to learning.

2. What could be done to improve the quality of this course?

Typeset notes would be useful. There is A LOT of information to capture in each lecture.

3. Do you believe this course should be offered? Explain.

Yes. A second part should be offered as well!

4. Add any other comments.

## SIDE 2

Instructors can improve their classes through thoughtful student reactions. Please comment on any of the following about which you have an opinion—and be frank. Instructors do not have access to course evaluations until after final grades have been submitted.

1. What personal qualities or teaching skills of the instructor contributed to the success of the course?

He was very enthusiastic about the subject matter and would explain things very well out of class. Also, many homeworks were very beneficial to us learning the material

2. What could be done to improve the quality of this course?

The professor often needed to be more organized, because he would sometimes get lost during lecture.

3. Do you believe this course should be offered? Explain.

Yes it is very useful when applied to practical systems and would be very useful in research

4. Add any other comments.

## SIDE 2

Instructors can improve their classes through thoughtful student reactions. Please comment on any of the following about which you have an opinion—and be frank. Instructors do not have access to course evaluations until after final grades have been submitted.

1. What personal qualities or teaching skills of the instructor contributed to the success of the course?

Enthusiasm

2. What could be done to improve the quality of this course?

Reduce HW length. Projects are always fun.

3. Do you believe this course should be offered? Explain.

Yes, we've needed an estimation course for a long time. GNC

4. Add any other comments.

Class was best when following Rhodes paper. Other references are always helpful.

## SIDE 2

Instructors can improve their classes through thoughtful student reactions. Please comment on any of the following about which you have an opinion—and be frank. Instructors do not have access to course evaluations until after final grades have been submitted.

1. What personal qualities or teaching skills of the instructor contributed to the success of the course?

Although he is new, the subject is interesting and he has a strong interest in the subject, which rubs off on the students. He is likeable and very intelligent, and he respects students.

2. What could be done to improve the quality of this course?

Although I learned a great deal in the course, there were a few times when a half-lecture review (or example problems) would have helped alot. The students all had different background experience, but we would all have benefited from said review (especially in the last couple weeks of semester).

3. Do you believe this course should be offered? Explain.

Absolutely, one of the best courses in grad school.

4. Add any other comments.

We learned such a volume of material, it was great. I just hope I didn't let something by me toward the end that was important to understanding the material.

## SIDE 2

Instructors can improve their classes through thoughtful student reactions. Please comment on any of the following about which you have an opinion—and be frank. Instructors do not have access to course evaluations until after final grades have been submitted.

1. What personal qualities or teaching skills of the instructor contributed to the success of the course?

- Good fundamental knowledge about the subject  
- Teaches from basics

2. What could be done to improve the quality of this course?

3. Do you believe this course should be offered? Explain.

Yes, very good course

4. Add any other comments.

## SIDE 2

Instructors can improve their classes through thoughtful student reactions. Please comment on any of the following about which you have an opinion—and be frank. Instructors do not have access to course evaluations until after final grades have been submitted.

1. What personal qualities or teaching skills of the instructor contributed to the success of the course?

Very knowledgeable

2. What could be done to improve the quality of this course?

It would be great if the lecture is more organized.  
Also, if the overall picture is given more frequently, that would greatly help.

3. Do you believe this course should be offered? Explain.

Yes. Very useful & enlightening

4. Add any other comments.

More references to books should be made.

## SIDE 2

Instructors can improve their classes through thoughtful student reactions. Please comment on any of the following about which you have an opinion—and be frank. Instructors do not have access to course evaluations until after final grades have been submitted.

1. What personal qualities or teaching skills of the instructor contributed to the success of the course?

On time and enthusiastic about the course

2. What could be done to improve the quality of this course?

reduce the amount of homework, specifically the redundant endless proofs, have about 3 homeworks allowing more time to critically think and think about the concepts rather than rushing to finish the next homework, also, the instructor should have more organized class notes the notes and class in general was scattered

3. Do you believe this course should be offered? Explain.

I do think this course has enough value that it should be offered, Estimation is the complement to controlling mechanical systems, one is not possible without the other

4. Add any other comments.

## SIDE 2
